

## End of Life Notice

**Date:** November 7, 2016

**To:** DryCal Customers & Distributors

**From:** Mesa Laboratories, Inc.

**Subject:** Product End of Life – Defender 530

Dear Mesa Customer,

Effective January 16th, 2017, Mesa Labs is discontinuing manufacturing of the Defender 530. Mesa will continue to accept any orders for the Defender 530 up until January 16th, 2017. Mesa will continue to accept RMA's for service and calibration for the foreseeable future, dependent on the availability of parts.

As a replacement to the Defender 530, Mesa Labs is introducing the new Defender 530+. The Defender 530+ features 0.75% volumetric accuracy of reading, an easy push button interface, MFC sensor factor, and three flow ranges to choose from. For more information about this new product, please visit our website at <http://drycal.mesalabs.com>.

If you would like to upgrade your existing Defender 530 for a higher accuracy instrument with an increased flow range, the recently released FlexCal (<http://drycal.mesalabs.com/flexcal-series/>) or our new Defender 530+ are our most state-of-the-art calibrators that can meet your needs.

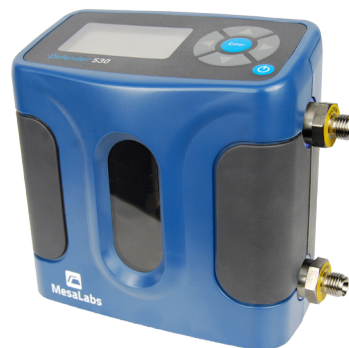

Mesa appreciates your business and looks forward to serving you for many years to come. If you have any questions about the discontinuation of the Defender 530, please feel free to contact a representative at [csbutler@mesalabs.com](mailto:csbutler@mesalabs.com) or your local distributor partner. To obtain an RMA for calibration or service, visit our website at <http://drycal.mesalabs.com/request-an-rma/>, contact customer service by phone at (973) 492-8400, or email us at [csbutler@mesalabs.com](mailto:csbutler@mesalabs.com).

Sincerely,

The Mesa Team
